Faculty of Economics

751100 ECON 100 Economics for Everyday Life 3(3–0–6)
Prerequisite : None
Basic economic concepts and application for everyday life concerning production, consumption, markets, national income, public finance, money and banking, inflation and deflation, employment, international trade and finance, and economic development and environment.

Faculty of Humanities

001101 ENGL 101 Listening and Speaking in English 3(3–0–6)
Prerequisite : None
English communication with emphasis on listening and speaking for social interaction and lifelong learning.

001102 ENGL 102 Reading and Writing in English 3(3–0–6)
Prerequisite : None
English reading and writing communication for lifelong with emphasis on vocabulary expansion, systematic grammar review, development of sentence structure and sentence variety, forms and purposes of paragraphs, progressing from mechanical to more meaningful context.

001201 ENGL 201 Critical Reading and Effective Writing 3(3–0–6)
Prerequisite : None
English language skills for critical reading from different sources and media and effective writing on topics of students’ interests.

001202 ENGL 202 English in Professional Contexts 3(3–0–6)
Prerequisite : None
Specific language features, language components of professional texts and language skills for professional texts.
PHIL 257 Ethics
Prerequisite: None

PHIL 269 Philosophy of Sufficiency Economy
Prerequisite: None
Definition, concept and principle of philosophy of sufficiency economy. Livelihood according to philosophy of sufficiency economy. Application of the principle philosophy of sufficiency economy.

PSY 110 Psychology and Daily Life
Prerequisite: None; for non-major only

HUGE 100 Usage of the Thai Language
Prerequisite: None
A study of the usage of the Thai Language and practice in writing.

HUGE 111 Man and Quest for Knowledge
Prerequisite: None
Development of thoughts and methods of thinking, which result in knowledge acquisition. Ultimate goals of individuals and societies. Inheritance, interconnection and integration of knowledge. Debates in theoretical approaches to knowledge. Modes of explanation on present social phenomena.

Faculty of Education
EDHL 101 Promoting of Health in Everyday Life
Prerequisite: None
Faculty of Fine Arts

109115  FAGE 115  Life and Aesthetics  3(3-0-6)

Prerequisite : None

Study of beauty in general; beauty that can be found in nature, works of art, traditions and culture and modern media used in daily life. The art section is divided into aesthetics of western and eastern art. The traditions and culture section takes into account inspiration, beliefs and cultural creations that reflect social wisdom.

Faculty of Business Administration

702101  FINA 101  Finance for Daily Life  3(3-0-6)

Prerequisite : None

Exploring your financial health, Planning your personal financial plan, Revenue, expense, and debt service management, Insurance, Knowing how to make money work, Tax planning, Preparing for happiness and case study of financial planning.

703103  MGMT 103  Introduction to Entrepreneurship and Business  3(3-0-6)

Prerequisite : None

Entrepreneur role in economics development country Entrepreneur and business opportunities. The characteristic of entrepreneur and motivation factors, environment, types of business, forms of business, business plans, principle of management, marketing management, production management, financial management, accounting, taxation, business law, international business and business ethics for entrepreneur.

703104  MGMT 104  Ethical Reasoning  1(1-0-2)

Prerequisite : None

703131  MGMT 131  Personal Leadership Development  1(1-0-2)

Prerequisite : None

Faculty of Law

176100  LAGE 100  Law and Modern World 3(3-0-6)

Prerequisite : None

Legal concepts. Legal Institutions. Law and its roles in society. Law and international societies. Law and local problems. Law and community rights. Roles of law in the rural and urban societies. Roles of law in the globalized era. Analyses of issues derived from case studies relating to law and modern world.

Faculty of Science

201114  SC 114  Environmental Science In Today's World 3(3-0-6)

Prerequisite : None

Environment and impacts from anthropogenic activities, Environmental concerns in international venues, Importance of biodiversity; conservation for the future, Resource use, Population growth and pollution, Ozone depletion, Global warming and climate change, Energy crisis, Sustainable development (balancing of natural resource consumption and replacement), and Current environmental issues.

201200  SC 200  Scientific Ethics for Thai Society 3(3-0-6)

Prerequisite : None

204100  CS 100  Information Technology and Modern Life 3(2-2-5)

Prerequisite : None

Computers in everyday life, Data processing and information management, Office automation software for modern life and Internet and webpage construction.

203154  CHEM 154  Basic Chemistry for Health Science Students 2(2-0-4)

Prerequisite : None

Chemical thermodynamics, chemical equilibrium, chemical kinetics, aliphatic hydrocarbons, aromatic compounds, stereochemistry, nucleophilic substitution, free radicals, alcohols ethers and phenols, aldehydes and ketones, carboxylic acids and their derivatives, amines, carbohydrates, amino acids, peptides and proteins, lipids, heterocycles and nucleic acids.
CHEM 159 Basic Chemistry Laboratory for Health Science Students 1(0–3–0)

Prerequisite: concurrent to 203153

The basic chemical experiments related to the following topics: heats of chemical reactions, electrochemical cells, acid–base indicators and hydrolysis of salts, buffer solutions: preparation and properties, rate of chemical reactions, steam distillation, identification of hydrocarbons, alcohols, phenols, aldehydes and ketones, stereochemistry, saponification of lipid, TLC separation of amino acids, isolation and identification of casein, isolation of lipids from egg yolk, isolation and identification of DNA from yeast.

PHYS 110 Physics: The Science that Changed the World 3(3–0–6)

Prerequisite: None

Paradigms and their revolutions, Ptolemy, Copernicus, and Kepler cosmos, Mechanistic perspective, Energy and thermodynamics, Electromagnetism, Atoms and matters, Quantum theory and holistic perspective, Space, time and theory of relativity and Frontier physics.

PHYS 125 Physics for Veterinary Students 1(1–0–2)

Prerequisite: None

Physics in health sciences, stability and equilibrium of body motion, elasticity, impulsive force and bone fractures, fluids mechanics and its medical applications, waves and properties of waves, sound and ultrasound imaging, electromagnetic spectrum and medical X-rays.

PHYS 195 Physics Laboratory for Veterinary Students 1(0–3–0)

Prerequisite: None

Measurement and error, coefficient of friction, rotational motion, moment of inertia and torsional motion of rigid body, surface tension of liquid, Young’s modulus, specific heat capacity of metal, resonance of sound, Ohm’s law and electrical meter, charge and discharge of capacitor, transformer and electrical equivalence of heat, resistor, inductor and capacitor in AC circuits, mirrors and lenses, interference and diffraction of light and spectrum of hydrogen atoms.

Faculty of Medicine

FMED 100 Disaster Preparedness for Health and Life 3(3–0–6)

Prerequisite: None

Basic knowledge of disaster science such as natural disaster including disease outbreak, accidental disaster and intentional disaster; learning from major historic disaster events. Preparedness of disaster at international and national level in government and non-government settings. Basic knowledge of health and safety preparedness while exposing to disaster events, before during and after. How to access the emergency medical service (EMS) during disaster events.
**Biochemistry for Veterinary Students**

Prerequisite: BIOL 182 (202182), CHEM 152 (203152) and CHEM 158 (203158) or BIOL 182 (202182), CHEM 153 (203153) and CHEM 159 (203159) or VM 108 (651108), CHEM 154 (203154) and CHEM 159 (203159)

The course emphasizes on the structure and functions of biomolecules in the cells of human and other mammals. The details of metabolism and regulation of biomolecules by hormones and enzymes, the production of energy in the cell. Gene expression and genetic diseases. Molecular diseases include cancer, diabetes, heart diseases, nutritional diseases, and thalsasemia, the biochemistry of blood and biological fluids. The principles of nutrition, various toxic substances in foods and the environment, carcinogenesis and the biochemistry of antibiotics are also included. These are discussed in a wide range for an understanding of biochemistry and application to prevent and control the causes of diseases. In the laboratory work are included the basics of biochemical instruments, chemistry tests for biomolecules, the activity and functions of enzymes, biochemistry tests for blood and urine, the determination of nutrients and toxic substances in foods and drinks.

**General Pathology for Veterinary Students**

Prerequisite: third year standing

The basics of general pathology including etiology, pathogenesis, morphologic changes and functional derangements and clinical significance. Moreover, the study includes neoplasm, both benign and malignant.

**Pharmacology for Veterinary Students**

Prerequisite: third year standing

Study of drugs and principles of pharmacology with special emphasis on mechanisms of drug action, effects on organ systems, pharmacokinetics, side effects and toxicity, indications, contra indication, precaution and drug interactions including chemical and drug residues in livestock. Laboratory sessions to promote understanding of the subject and to gain insight into problems of drug usage.

**Physiology for Veterinary Students**

Prerequisite: third year standing

The basic medical functions including normal and abnormal mechanisms which regulate mammalian organs will be studied.
Radiology for Veterinary Students 2(1–3–3)
Prerequisite: third year standing
Basic knowledge and skill in radiographic imaging in assisting the diagnosis of abnormality in animals and application of radiological instruments for routine examinations and research.

Faculty of Nursing
571111 NGGE 111 Critical Thinking and Creative Thinking 3(2–2–5)
Prerequisite: None

571113 NGGE 113 Maintenance of Equilibrium in Adolescent Life 3(3–0–6)
Prerequisite: None
Study of factors influencing adolescents’ way of life, including both positive and negative factors. Ways of maintaining the equilibrium in adolescents’ way of life. Prevention and management of physical, psychosocial, emotional and spiritual problems in adolescent’s lives.

Faculty of Associated Medical Sciences
510100 AMS 100 Wellness 3(2–6–4)
Prerequisite: None
Involving the wellness and health status in physical, emotional, social, intellectual and spiritual wellness including principle of good health in holistic both knowledge and merit, following by diet, nutrition, exercise, fitness, wellness and health status laboratory monitoring, stress management and ethic.

Faculty of Agriculture
351100 AEC 100 Agricultural Economics Based on Sufficiency Economy 3(3–0–6)
Prerequisite: None
Study on His Majesty the King’s sufficiency economy philosophy and the royal obligations as a foundation and representations of what applicable for leading one’s daily life at the individual, household, and community levels. Stress on students’ the learning from experience of various rural and agricultural communities which have applied the sufficiency economy principle, exercising systematic analytical thinking’s, and proposing agricultural business model within sufficiency economy framework.
HORT 204 Horticultural for Health 2(2–0–4)
Prerequisite: None
Importance, categories, production, and health benefits from horticultural crops which are vegetables, medicinal plants, fruits, and flowers, including their use as horticultural therapy.

CONS 211 Principles of Conservation 3(3–0–6)
Prerequisite: None
Problems concerning deterioration of natural resources and environments. Principles and methods of management and conservation of natural resources.

CONS 211 Agricultural Business Management 3(3–0–6)
Prerequisite: AEC 200 (351200) or ECON 100 (751100) or ECON 101 (751101)
An application of economic principles and business methods in decision making to problems confronting agricultural business; problems in acquisition, organization and management of land, labor and capital.

ANS 202 Principles of Feed and Animal Nutrition 3(3–0–6)
Prerequisite: None; for non–major students
Types and roles of feedstuffs, composition and evaluation of feed, digestion and metabolism of nutrients, feed preservation and processing and nutrient requirements of animals.

ANS 231 Animal Breeding 3(3–0–6)
Prerequisite: None; for non–major students
Introduction to genetic foundations of animal breeding, gene expression Mendel’s law of genetic inheritance, estimation of repeatability and breeding value, principles of selection and improvement.

ANS 242 Principle of Monogastric Animal Production 3(3–0–6)
Prerequisite: None; for non–major students
Breeding, feeding, housing and management practices for poultry and swine, the production system, prevention and control of common diseases.
356243  ANS 243  Principle of Ruminant Production 3(3–0–6)
Prerequisite: None; for non–major students
Breed origins of important ruminants, types and breeds for production of milk and meat, reproduction, lactation, growth and development of compound stomachs, forms of husbandry and systems of production for milk and meat. Genetic improvement of production performance and management of forage production.

356261  ANS 261  Statistical Method and Inference in Animal Husbandry 3(3–0–6)
Prerequisite: second year standing
Statistic with special reference to the application in animal science, from probability, normal distribution, test of significance to factorial and splitplot design. Correlation and regression. Analysis of covariance. The computation of heritability and repeatability.

Faculty of Veterinary Medicine

651100  VM 100  Dog Care 2(1–2–3)
Prerequisite: None
General considerations for dog’s owner, principle of dog care, behavior, restraint, reproductive system pregnancy including basic health information

651104  VM 104  Elephant in Thai Cultures 2(2–0–4)
Prerequisite: None
Study of Thai elephant cultures and knowledge, as the elephant biology, elephant in Thai cultures, customs, legends faiths, religions, and histories, the knowledge of the illustrated manuscript (the book on elephant science), elephant poaching, elephant training, logging, and to domesticate elephant, mahout and elephant keeper, elephant managements, elephants in Thailand.

651107  VM 107  Student Quality Development Through Activities 2(1–3–0)
Prerequisite: None
This course is designed to introduce students in developing their life–skill experiences through activities which are initiated by them. Learning activities will be emphasizing on the development of students personality, morality and ethical behaviors. Attention will be given to various learning activities including recognizing art and culture, understanding of local wisdom, preserving of environment as well as exploring the role of community–based economics. Various activities will also be organizing by students under the supervision agreement of class advisors with private/governmental organizations.

651291 VM 291 Veterinary Integrative Problem Solving 1  2(2–0–4)
Prerequisite: second year standing; for veterinary medicine students
Use of problem based learning system to integrate material and problems taught in the second semester of the second year through seminar. Practice problem analysis and integration of subject material, information search, veterinary terminology and scientific literature review.

651292 VM 292 Animal Behaviors and Restraints  2(1–2–3)
Prerequisite: second year standing; for veterinary medicine students
Animal handling, restraint and animal behavior.

651301 VM 301 Body Structure and Function 3  3(2–3–5)
Prerequisite: PHSO 361 (321361), VM 201 (651201)
Comparative study in gross anatomy, histology, physiology and functional mechanism of the respiratory, cardiovascular and hemo-lymphatic systems of several domestic animals, study of body structure and functional mechanism of fish, including the clinical applications.

651302 VM 302 Body Structure and Function 4  3(2–3–5)
Prerequisite: PHSO 361 (321361), VM 201 (651201)
Comparative study in gross anatomy, histology, physiology and functional mechanism of the nervous system and special sense organs of several domestic animals, study of body structure and functional mechanism of avian, including the clinical applications.

651304 VM 304 Agents of Diseases 2  5(3–6–9)
Prerequisite: third year standing; for veterinary medicine students.
Classification, morphology and identification of agents of diseases in domestic animals comprising helminthes, arthropods, protozoa rickettsiae, viruses and prions.

651305 VM 305 Veterinary Pharmacology and Toxicology  4(3–3–7)
Prerequisite: third year standing; for veterinary medicine students.
Drugs used in animals, toxic substances and residues.

651322 VM 322 Theriogenology  3(2–3–5)
Prerequisite: third year standing; for veterinary medicine students.
Male and female theriogenology in ruminant, swine, poultry, aquatic animal, canine and feline, equine, elephant and wildlife. Mating behavior, obstetrics, and biotechnology in reproduction.
651390 VM 390 Veterinary Field Practice 1 1(0–6–3)

Prerequisite: third year standing; for veterinary medicine students.

Provide experience in farm management practice through working on commercial farm or in other related facilities.

651391 VM 391 Veterinary Integrative Problem Solving 2 2(2–0–4)

Prerequisite: third year standing; for veterinary medicine students.

Use of problem based learning system to integrate material and problems taught in the first and the second year through seminar. Practice problem analysis and integration of subject material, information search, veterinary terminology and scientific literature review.

651392 VM 392 Veterinary Integrative Problem Solving 3 2(2–0–4)

Prerequisite: third year standing; for veterinary medicine students.

Using problem based learning systems to integrate materials and problems taught in the 2nd semester of the 3rd year in a seminar.

651414 VM 414 Veterinary Pathobiology 2 3(2–3–5)

Prerequisite: fourth year standing; for veterinary medicine students.

Functional aspects of humoral and cellular immune response, hypersensitivity, mechanisms of immunity to microbial infection, tumor immunity including immune mediated diseases and immunological assay methods.

651415 VM 415 Veterinary Pathobiology 3 5(3–6–9)

Prerequisite: fourth year standing; for veterinary medicine students.

The course is focusing on the reactions of specific organ systems to injuries including the applications and interpretations of basic laboratory tests applied to clinical diagnosis of corresponding systemic alterations.

651416 VM 416 Food Safety in Veterinary Medicine 1 4(3–3–7)

Prerequisite: fourth year standing; for veterinary medicine students.

Role of veterinarian in food safety from animal origin, specimen sampling for quality control, roles of microorganism in food from animal origin on food chain, foodborne disease, composition of food from animal origin, deterioration and preservation in food from animal origin, raw material and food additive in animal-origin food production, contaminant and impurity in food from animal origin and technology in animal-originated food production food.
Prerequisite: fourth year standing; for veterinary medicine students.

Hygienic production and processing of food from animal origin, principle of quality control in meat, milk, egg and aquatic animal, food hygiene, personal hygiene, cleaning and use of disinfectant, cross-contamination management and food processing standard for consumer and export.

Prerequisite: fourth year standing; for veterinary medicine students.

Mutagen and carcinogen, residue toxicology, animal waste management, environmental toxicology, environmental hygiene and sustainable development, environmental management from farm and animal product processing, laws and regulations concerning environment, risk analysis and risk assessment.

Prerequisite: fourth year standing; for veterinary medicine students.

Introduction to law, veterinary laws and legislative practice, public health laws, and rules and regulations mandated by international organization.

Prerequisite: fourth year standing; for veterinary medicine students.

Zoonoses classification, causative agents, transmission, vector, clinical symptoms in both human and animals, prevention, diagnosis and treatment of important zoonoses caused by virus, bacteria, parasite, chlamydia and fungus.

Prerequisite: fourth year standing; for veterinary medicine students.

Scope and significance of epidemiology, disease occurrence and dissemination, epidemiological parameters, sample size and sampling methods, association and causation, epidemiological studies, diagnostic test evaluation, disease screening, outbreak investigation, disease surveillance, disease prevention control and eradication, molecular epidemiology, and biostatistics.

Prerequisite: fourth year standing; for veterinary medicine students.

Principle of history taking, physical examination, problems and clinical signs, specimen collection techniques, diagnostic techniques, immunization and drug administration of veterinary medicine
651427 VM 427 Veterinary Surgery 5(3–6–9)
   Prerequisite: fourth year standing; for veterinary medicine students.
   Theories and practice of anesthesia and surgery in small animal, equine, wildlife, aquatic animal, ruminant and swine.

651432 VM 432 Diseases of Aquatic Animal, Amphibians and Reptiles 2(2–0–4)
   Prerequisite: fifth year standing; for veterinary medicine students
   Lecture on common diseases, diagnosis, therapeutic techniques, prevention and control of disease in aquatic animal, amphibians and reptiles.

651433 VM 433 Laboratory Animal Science 3(2–2–5)
   Prerequisite: fourth year standing; for veterinary medicine students.
   General consideration in laboratory animal care, species and breed, biology and husbandry, housing and management, production system, prevention and control of disease, materials for laboratory animal care and technique for restraint, veterinary clinical procedure of laboratory animals, and ethics in usage of laboratory animals.

651491 VM 491 Veterinary Field Practice 2 1(0–6–3)
   Prerequisite: fourth year standing; for veterinary medicine students.
   Practice in vaccine production through visiting government and private biological production units.

651492 VM 492 Veterinary Integrative Problem Solving 4 2(2–0–4)
   Prerequisite: fourth year standing; for veterinary medicine students.
   Using problem based learning systems to integrate materials and problems taught in the 1st semester of the 4th year in a seminar.

651495 VM 495 Veterinary Perspectives 2(2–0–4)
   Prerequisite: sixth year standing; for veterinary medicine students
   Veterinary hospital and practice management, human–animal bonds, cost–benefits in animal production, communication skills, professional development, information management, animal welfare and laws concerned.
651520  VM 520  Principle of Production Medicine  2(2–0–4)
Prerequisite: fifth year standing; for veterinary medicine students
The production systems, disease surveillances, prevention and control, production efficiency monitoring, animal health and production management in animal, problems and problem solving in production medicine.

651531  VM 531  Diseases of Dogs and Cats  5(5–0–10)
Prerequisite: fifth year standing; for veterinary medicine students
Production systems, management and mismanagement problems, common diseases, surgical and reproductive problems of dogs and cats.

651533  VM 533  Diseases of Zoo and Exotic Animal  2(2–0–4)
Prerequisite: fifth year standing; for veterinary medicine students
Production system, management and mismanagement problems common diseases, surgical problem and reproductive problem of zoo and exotic animal.

651534  VM 534  Diseases of Poultry  4(4–0–8)
Prerequisite: fifth year standing; for veterinary medicine students
Production systems, management and mismanagement problems, common diseases, and reproductive problems of poultry.

651536  VM 536  Diseases of Swine  5(5–0–10)
Prerequisite: fifth year standing; for veterinary medicine students
Production systems, management and mismanagement problems, common diseases, surgical and reproductive problems of swine.

651537  VM 537  Diseases of Horse  3(3–0–6)
Prerequisite: fifth year standing; for veterinary medicine students
Diseases and problems in medicine and surgery of musculoskeletal, nervous system and ocular, digestive, respiratory, skin and reproductive systems, and proper corresponding treatments. Diseases and problems from improper management, malnutrition, epidemic diseases in horses and prevention and pediatric diseases and problems.

651538  VM 538  Diseases of Ruminants  5(5–0–10)
Prerequisite: fifth year standing; for veterinary medicine students
Major systematic diseases and disorders of ruminant, monitoring management problems and solutions.

</table>
651547 VM 547 Clinical Rotation in Ruminant 2(0–6–3)
Prerequisite: fifth year standing; for veterinary medicine students
Clinical skills in ruminant including herd health management, medicine, laboratory diagnosis, milking machine performance and maintenance and basic examination of reproductive system.

651548 VM 548 Clinical Rotation in Aquatic Animal 1(0–3–1)
Prerequisite: fifth year standing; for veterinary medicine students
Clinical skills in aquatic animal including drugs and chemical substances administration, anesthesia and surgery, blood sampling, physical examination, necropsy and diagnostic procedure, water sampling and analysis, production and management in fish farm.

651594 VM 594 Veterinary Integrative Problem Solving 5 2(2–0–4)
Prerequisite: fifth year standing; for veterinary medicine students
Using problem based learning systems to integrate materials and problems taught in 2nd semester of the 4th year in a seminar.

651630 VM 630 Aquatic Animal Practice – Clerkship 3(0–9–4)
Prerequisite: sixth year standing; for veterinary medicine students
Practice clinical skills in aquatic animal including production management, diagnostic and therapeutic techniques and studying on aquatic animal researches under supervision of instructors and adjoined veterinarians in animal health center, demonstration farm, commercial farm, animal hospital and other related facilities in government and private sectors.

651631 VM 631 Elephant and Wildlife Practice – Clerkship 3(0–9–4)
Prerequisite: sixth year standing; for veterinary medicine students
Practice clinical skills in elephant, wildlife and exotic pets including health management, necropsy, diagnostic and therapeutic techniques and studying on elephant, wildlife and exotic pets researches under supervision of instructors and adjoined veterinarians in animal health center, farm, animal hospital and other related facilities in government and private sectors.

651640 VM 640 Necropsy and Diagnostic Laboratory – Clerkship 3(0–9–4)
Prerequisite: sixth year standing; for veterinary medicine students
Provide clinical experiences in necropsy and diagnostic laboratories practice through working veterinarian under supervision of instructors or adjoined veterinarians in Animal Health or demonstration farm, commercial farm, animal hospital or other related facilities.
