**Abstract** Normal hematologic value and normal blood chemistry value were studied during June, 00 – July 02 at the Small Animal Hospital, Faculty of Veterinary Medicine, Chiang Mai University. Blood samples were collected from 123 healthy dogs, which divided to small size, medium size and large size. The age of dogs were 8 month – 14 year old. The results found the Hct, Hb, BUN, ALT, lymphocyte, eosinophil were significantly higher than normal value meanwhile creatinine and AST were lesser than normal value.
